# Critical perspectives on user involvement

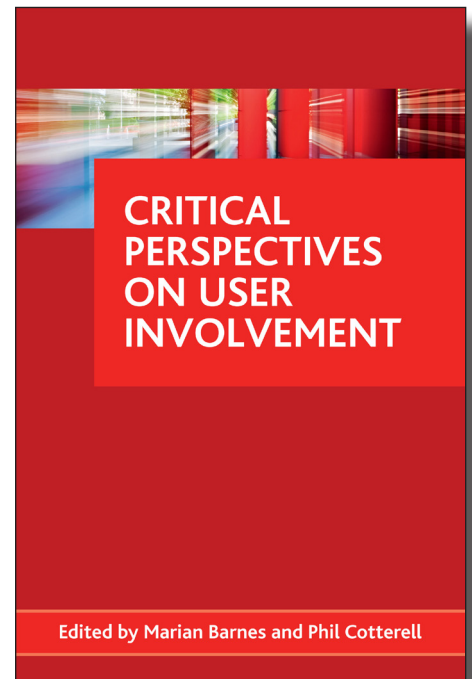

**Edited by Marian Barnes and Phil Cotterell**

"A stimulating book, exploring the origins and rich diversity of service user involvement in health and social care." **Ann Davis, University of Birmingham**

Drawing on contributions from user activists and academic researchers, this topical reader provides a critical stock take of the state of user involvement. It considers different contexts in which such involvement is taking place and includes diverse and sometimes conflicting perspectives on the issues involved. This original and insightful critique will be an important resource for students studying health and social care and social work, researchers and user activists.
